

# Codonics Infinity 1.4.2 Operating Software

**Release Notes**

---

## **Version 1.4.2 Release Notes**

### **Summary**

Version 1.4.2 software provides improvements for the Codonics Infinity® LX Medical Image Server.

This software is only compatible with Infinity LX servers. It is not compatible with Infinity C servers.

**NOTE:** This version of software cannot be downgraded to a previous released version after being upgraded to version 1.4.2.

The Infinity Medical Image Server is an expandable DICOM storage appliance that provides a solution for storing and retrieving medical images. Applications include temporary storage of large DICOM data sets directly from any modality, and storage of digital images in an environment without a centralized, digital image archive.

This document details the changes from version 1.4.1 software. The Infinity LX User's Manual provides further information on the use of the Infinity system. If you are upgrading from an older version, previous Infinity Release Notes can be downloaded from the Codonics web site.

### **Improvements**

- ◆ **Support for the latest revision of the Adaptec by PMCTM Series 5 (51645) RAID card.**

### **Technical Support**

If problems occur during software installation, contact Codonics Technical Support between the hours of 8:30AM and 5:30PM EST (weekends and U.S. holidays excluded).
